Seattle, WA

PROFILE

Experienced Senior Web Developer with a large skill set and a strong creative vision to deliver impactful web projects of all scales. Passionate about creating visually stunning and experiential websites that enhance user experiences and empower organizations to strengthen their brand through innovative and engaging online interactions.

EXPERIENCE

EDELMAN / WASHINGTON, D.C.

I started at Edelman as an intern and, through dedication and hard work, rose to the position of Senior Web Developer within a small, highly skilled team. Our team was tasked with addressing the web development needs of a diverse portfolio of US clients. Over the course of six years, I led and contributed to a wide array of projects, from large-scale custom website builds to innovative and interactive websites that pushed creative boundaries. My commitment to excellence and continuous improvement earned me four promotions, and I played a key role in multiple projects that received awards. My time at Edelman honed my technical expertise and creative vision, solidifying my passion for creating exceptional online experiences.

Senior Web Developer　　　　　　　*— Aug 2022 - Present*
- Lead and oversee the execution of new projects, providing regular progress updates to both internal and external teams.
- Develop detailed project estimates and level of effort assessments for new initiatives and business pitches, ensuring accurate resource allocation and timeline planning.
- Provide guidance and mentorship to junior developers, fostering skill development and promoting best practices in coding and project management.
- Participate in client meetings, offering technical expertise and insights to drive project success and ensure alignment with client objectives.
- Strategize and implement comprehensive solutions to address client requirements, utilizing advanced problem-solving skills and innovative approaches to meet and exceed expectations.

Mid Level 2 Web Developer　　　　　*— Mar 2021 - Aug 2022*
- Facilitate site launches - including updating DNS, setting up SSLs, deploying code, copying staging environments to production, updating databases and rewriting references.
- Perform in-depth site analysis to assess performance and accessibility, Meticulously document all identified issues, and propose targeted solutions for enhancement.

Mid Level 1 Web Developer　　　　*— Aug 2019 - Mar 2021*
- Collaborate closely with fellow developers and make significant contributions to major projects.
- Collaborate with designers in feasibility meetings, animation brainstorming sessions, and other creative ideation processes to ensure technical viability and innovative solutions.

- Participate in the documentation of processes, coding preferences, checklists, and various reference materials that serve as valuable resources for the team, or aiding in the seamless onboarding of new team members.
- Create custom websites using various technologies and content management systems.

Junior Web Developer — *Nov 2018 - Aug 2019*
- Maintain client sites by updating plugins, addressing security vulnerabilities or adding new functionality and additions.
- Compose platform briefs outlining the structure of websites/CMS, how the site will be built, where it will be hosted, etc.
- Contribute to User Experience discovery and competitor content analysis.
- Explore and stay aligned with innovative techniques for integrating cutting-edge technology into our websites.
- Writing and implementing efficient and reusable code that is semantically correct and using best practices.

Intern Web Developer — *Aug 2018 - Nov 2018*
- Updated and maintained client websites by managing plugins, addressing security vulnerabilities, and adding new functionalities.
- Assisted in debugging and resolving minor issues on client websites.
- Implemented small edits and new features on existing client websites.
- Prepared weekly team meeting PowerPoint decks and shared weekly inspiration.
- Contributed to slicing website design files for development.
- Actively participated in code reviews
