Los Angeles, CA

Profile

Experienced Web Developer with a large skill set and a strong creative vision to deliver impactful web projects of all scales. Passionate about creating visually stunning and experiential websites that enhance user experiences and empower organizations to strengthen their brand through innovative and engaging online interactions.

Experience

Foster Made / Remote

At Foster Made, I contribute to a diverse range of projects across multiple tech stacks, including Headless WordPress, React with TypeScript, traditional WordPress, Craft CMS with Twig, and static sites built with Next.js and Faust.js. Beyond development, I have taken on roles in project management, direct client engagement, and providing UX/UI guidance, ensuring both technical excellence and client satisfaction.

Web Developer — *Mar 2025 - Current*
- Partner with the lead developer to define technical strategies for new initiatives and ongoing projects.
- Manage projects end-to-end, from initial planning through delivery, ensuring quality and client satisfaction.
- Attend client meetings to provide technical expertise, project updates, and strategic recommendations.
- Serve as the primary point of contact for designated clients, building strong relationships and trust.
- Track and manage project time to ensure alignment with estimates and budgets.
- Collaborate with fellow developers on large-scale projects to deliver cohesive, high-quality solutions.

Edelman / Washington, D.C.

I started at Edelman as an intern and, through dedication and hard work, rose to the position of Senior Web Developer within a small, highly skilled team. Our team was tasked with addressing the web development needs of a diverse portfolio of US clients. Over the course of six years, I led and contributed to a wide array of projects, from large-scale custom website builds to innovative and interactive websites that pushed creative boundaries. My commitment to excellence and continuous improvement earned me four promotions, and I played a key role in multiple projects that received awards. My time at Edelman honed my technical expertise and creative vision, solidifying my passion for creating exceptional online experiences.

Senior Web Developer — *Aug 2022 - Dec 2024*
- Lead and oversee the execution of new projects, providing regular progress updates to both internal and external teams.
- Develop detailed project estimates and level of effort assessments for new initiatives and business pitches, ensuring accurate resource allocation and timeline planning.
- Participate in client meetings, offering technical expertise and insights to drive project success and ensure alignment with client objectives.
- Strategize and implement comprehensive solutions to address client requirements, utilizing advanced problem-solving skills and innovative

approaches to meet and exceed expectations.

Mid Level 2 Web Developer *— Mar 2021 - Aug 2022*
- Facilitate site launches - including updating DNS, setting up SSLs, deploying code, copying staging environments to production, updating databases and rewriting references.
- Perform in-depth site analysis to assess performance and accessibility, Meticulously document all identified issues, and propose targeted solutions for enhancement.

Mid Level 1 Web Developer *— Aug 2019 - Mar 2021*
- Collaborate closely with fellow developers and make significant contributions to major projects.
- Collaborate with designers in feasibility and brainstorming sessions to ensure technical viability and innovative solutions.
- Document processes, coding standards, and reference materials to support the team and streamline new member onboarding.
- Create custom websites using various technologies and content management systems with a consistent level of quality.

Junior Web Developer *— Nov 2018 - Aug 2019*
- Maintain client sites by updating plugins, addressing security vulnerabilities or adding new functionality and additions.
- Contribute to User Experience discovery and competitor content analysis.
- Explore and stay aligned with innovative techniques for integrating cutting-edge technology into our websites.

Intern Web Developer *— Aug 2018 - Nov 2018*
- Updated and maintained client websites by managing plugins, addressing security vulnerabilities, and adding new functionalities.
- Implemented small edits and new features on existing client websites.
- Prepared weekly team meeting PowerPoint decks and shared weekly inspiration.
