Seattle, WA

Profile

Experienced Web Developer with a large skill set and a strong creative vision to deliver impactful web projects of all scales. Passionate about creating visually stunning and experiential websites that enhance user experiences and empower organizations to strengthen their brand through innovative and engaging online interactions.

Experience

Foster Made / Remote

At Foster Made, I contribute to a diverse range of projects across multiple tech stacks, including Headless WordPress, React with TypeScript, traditional WordPress, Craft CMS with Twig, and static sites built with Next.js and Faust.js. Beyond development, I have taken on roles in project management, direct client engagement, and providing UX/UI guidance, ensuring both technical excellence and client satisfaction.

Web Developer – **Mar 2025 - Current**

- Partner with the lead developer to define technical strategies for new initiatives and ongoing projects.
- Manage projects end-to-end, from initial planning through delivery, ensuring quality and client satisfaction.
- Optimized large-scale web applications by conducting performance audits, reducing load times, and improving accessibility to support high-traffic, multi-device usage.
- Engineered scalable, reusable front-end components with automated Jest testing, implemented CI/CD pipelines, and drove code reviews to uphold reliability and best practices.
- Attend client meetings to provide technical expertise, project updates, and strategic recommendations also serving as some clients primary point of contact.
- Implemented post-launch monitoring tools to track site health, performance, analytics, and security vulnerabilities.

Edelman / Washington, D.C.

I started at Edelman as an intern and, through dedication and hard work, rose to the position of Senior Web Developer within a small, highly skilled team. Tasked with addressing the web development needs of a diverse portfolio of US clients. Over the course of six years, I led and contributed to a wide array of projects, from large-scale custom website builds to innovative and interactive websites that pushed creative boundaries. My commitment to excellence and continuous improvement earned me four promotions, and I played a key role in multiple projects that received awards. My time at Edelman honed my technical expertise and creative vision, solidifying my passion for creating exceptional online experiences.

Senior Web Developer – **Aug 2022 - Dec 2024**
Mid Level 2 Web Developer – **Mar 2021 - Aug 2022**
Mid Level 1 Web Developer – **Aug 2019 - Mar 2021**
Junior Web Developer – **Nov 2018 - Aug 2019**

- Led the development of animations for the SeeMySkin campaign using CSS and JavaScript, contributing to a project that won 3 Cannes Lions in 2023 and generated over 900M impressions with 6,000+ organic site visits in the first two weeks.
- Took full-stack ownership of the See the Eye campaign, collaborating with designers and animators to deliver an award-winning site that achieved 4.9B earned media impressions, a 1,400% increase in clicks to AOA's doctor locator tool, and recognition with a Webby Award in the Health & Wellness category.
- Utilized expertise in React and Vue to develop modular online tools that enhanced client site engagement. For Drive Electric, built a Vue-based car finder tool integrated with an API to help users explore electric vehicle options. For the U.S. Global Leadership Coalition, I helped develop a React-powered tool to tell stories showcasing how businesses, NGOs, foundations, and universities partner with the U.S. government to address global challenges.
- Managed projects end-to-end, delivering performant, user-focused websites with a strong emphasis on solving client needs and business objectives.

Education

Interactive Development – Sep 2016 - Mar 2018
The Creative Circus - Atlanta, GA
